

Fullname	Nguyễn Duy Tư	Email	mr.kevinduy@gmail.com	
Date of Birth	22/08/1990	Address	Số 5, Ngõ 4, Đỗ Đức Dục, Hà Nội	
Gender	Nam	Github	https://github.com/mr-kevinduy	
Tel	033 982 2890			
Career Objective				
	I aim to grow into a highly skilled Software Architect with strong expertise in backend development, cloud infrastructure, and system design. My goal is to design scalable, high-performance, and secure systems that solve real-world business problems.			
Education				
	2008 – 2013	Thuy Loi University - Ha Noi Major: Information Technology		
Skills				
	Programming Languages	PHP, Bash Shell, Python, NodeJS, HTML/HTML5, CSS/CSS3, LESS/SASS, Javascript		
	Frameworks / Libraries / CMS	Laravel, Wordpress, jQuery, ReactJs, VueJS		
	Databases	MySQL		
	Infrastructure / Cloud	AWS		
	Development Tools	NPM, Gulp, Webpack, Git and Docker.		
	Project Management Tools	Backlog, Redmine, Jira		
	Source Code Management	Github, Gitlab, Backlog Git, Bitbucket		
	Operating Systems	Windows, MacOS, Linux (Ubuntu, CentOS)		
Work Experience				
	2018 - 2019	Kaopiz Software Co., Ltd. Developed systems using HTML, CSS, JavaScript, React.js, Vue.js		
	2019 - 2024	CO-WELL Asia Co., LTD Developed PHP (Laravel), HTML, JavaScript, jQuery, Shell Script, Python, and AWS solutions		
	2024 - 2025	Zensho Hà Nội System Center Co. Ltd Developed PHP (Laravel), HTML, JavaScript, jQuery, Shell Script, Python, Node.js, and AWS solutions		
	2025 - Present	Freelance Developed PHP, WordPress, HTML, JavaScript, React.js		
Projects				
	05/2025 - Present	WordPress CMS Development ■ Main Tasks: - Develop WordPress plugins - Maintain WordPress websites		
	02/2025 - 05/2025	Ads Management Website - Manage Google Ads accounts - Manage customers and campaign statistics - Analyze user interactions with Google Ad ■ Team Size: 4 ■ Role: Fullstack Developer ■ Technologies Used: - Backend: PHP (Laravel) - Frontend : ReactJs (NextJs), HTML, CSS - Database : MySQL ■ Main Responsibilities: - Write APIs and develop core functions - Design and maintain databases		

	06/2024 - 02/2025	Video Playback Website An application for video management and video playback ■ Team Size: 4 ■ Role: FullStack Developer ■ Technologies Used: - Infra : AWS - Backend : PHP/Laravel - Frontend : Javascript, Html, CSS, JQuery - Database : MySQL - Other : Nodejs Lambda Function, Tool by Python - Development Env: use Docker tool. ■ Main Responsibilities: - Fix bugs and develop new features. - Investigate and resolve infrastructure issues related to AWS - Upgrade and convert AWS services approaching end-of-support. - Write technical documentation and system design specifications - Review source code and ensure coding standards - Support team - Work with AWS services - Work with tools: Cron, Incron, Logrotate, Supervisor, Jenkins, Sonarqube
	07/2019 - 03/2024	DougaSite - Video Management Website An application for video playback, e-learning, and surveys - Video Management - Playback with HTTP Streaming - Playback with preview thumbnail, chapter, survey - Transcoding video - Transcript video - View statistics report ■ Team Size: 3 ■ Role: FullStack Developer ■ Technologies Used: - Infrastructure: AWS - Backend: PHP (Laravel) - Frontend: JavaScript, HTML, CSS, jQuery - Database: MySQL - Other: Bash Shell, RTMP Server, Redis, AWS Lambda Functions, Python tools ■ Main Responsibilities: - System maintenance and bug fixing - Develop and maintain new features - Review source code - Database design and optimization - Set up Web Server, Reverse Proxy Server, RTMP Server (using Red5 Pro) - Setup automatic deployment with Deployer tool. - Video transcoding server using FFmpeg - Work with Linux Server, Amazon Linux, Ubuntu - Working with AWS services: EC2, Load Balancer, RDS, Elastic Transcoder, AWS Translate, AWS Transcribe, Lambda Function, S3, Cloudfront, WAF, Cloud Watch - Monitoring with tools: Cron, Incron, Logrotate
	2018 - 2019	EC Web - E-Commerce website Using blockchain technology to build an e-commerce website ■ Team Size: 6 ■ Role: Frontend Developer ■ Technologies Used: - Backend : Solidity, Nodejs - Frontend : VueJs
	2018 - 2019	Onsept - Building Management Website Application for the construction industry, is a single page application (SPA - Reactjs) ■ Team Size: 7 ■ Role: Frontend Developer ■ Technologies Used: - Backend : PHP - Frontend : ReactJS
	2017 - 2018	- Developed WordPress plugins and themes - Developed Shopify themes - Converted Photoshop designs to HTML markup

Hobbies	
	- Play game
	- Listen music
	- Reading technical blogs
